

Apéndice. Demostraciones con diagramas

Presentamos los diagramas asociados a distintas igualdades formuladas en el Capítulo 5, con el propósito de mostrar la claridad y eficiencia que ofrecen.

$$(f^r \otimes \text{Id}_y) \circ \eta_y = (\text{Id}_{x^r} \otimes f) \circ \eta_x$$

$$(\mathrm{Id}_{z^r} \otimes \varepsilon_f) \circ (\eta_g \otimes \mathrm{Id}_{x^r}) = (f \circ g)^r$$

$$(\varepsilon_g \circ \text{Id}_z) \circ (\text{Id}_x \circ \eta_f) = f \circ g$$

$$\varepsilon_{f \circ g} = \varepsilon_f \circ (g \otimes \text{Id}_{x^r})$$

$$\varepsilon_{f \circ g} = \varepsilon_g \circ (\text{Id}_y \otimes f^r)$$
